

Sales Performance Dashboard With SQL Integration

Creating two tables

TABLE 1 *ecommerce_customer*

Columns								+
	Name	Data type	Length/Precision	Scale	Not NULL?	Primary key?	Default	
⋮ / ⓘ	customer_name	character varying v	50		☒	☐		
⋮ / ⓘ	Email	character varying v	100		☒	☐		
⋮ / ⓘ	City	text v			☐	☐		

Import/Export data - table 'ecommerce_table' ✕

General Options Columns

Import/Export

Filename

C:\Users\njaya\OneDrive\Attachments\Downloads\Data_30\Data\ec 📁

Format

csv | v

Encoding

UTF8 ✕ | v

On Error

stop | v

Specifies how to behave when encountering an error converting a column's input value into its data type. An error_action value of stop means fail the command, while ignore means discard the input row and continue with the next one. The default is stop. The ignore option is applicable only for COPY FROM when the FORMAT is text or csv.

Log Verbosity

default | v

Specify the amount of messages emitted by a COPY command: default or verbose. If verbose is specified, additional messages are emitted during processing. This is currently used in COPY FROM command when
